SUBJECT INDEX

Analytical GPC columns packed with porous silica beads, evaluation of, 119
Applications and techniques, new, in GPC, 131
Aromatic hydrocarbon materials, polynuclear, GPC studies of, 171
Axial-diffusion equation, Tung's, for GPC, method of solving, 23
Beads, porous silica, evaluation of analytical GPC columns packed with, 119
Bio-Glas chromatography substrates, optical and electron microscopy of, 253
Carboxy-terminated polybutadienes, analysis of, by GPC, preliminary investigation, 297
Celluloses, characterization of, by GPC, 267
  wood, characterization of chain length distribution of, by GPC, 283
Chain length distribution of wood celluloses, characterization of, by GPC, 283
Characterization, of celluloses by GPC, 267
  of chain length distribution of wood celluloses by GPC, 283
  of HB polymer with GPC, 225
Chromatogram interpretation, factors affecting, 43
Columns, analytical GPC, packed with porous silica beads, evaluation of, 119
Computational method, reshaping, of resolving GPC, 67
Correcting for imperfect resolution, methods of, 83
Crosslinking, examination of, with GPC, 159
  in irradiated paraffins, application of GPC to, 183
Efficiency of GPC, 31
Elastomers, oil-extended, simultaneous measurement of oil content and molecular weight distribution of, by GPC, 317
Electron and optical microscopy of Bio-Glas chromatography substrates, 253
Elution behavior of model compounds in GPC, 105
Evaluation of analytical GPC columns packed with porous silica beads, 119
Exclusion chromatography, high-temperature, of polyethylenes, method for, 143
Fractionation, of linear polyethylene with GPC, 153
  and resolution in GPC, 13
Functional group and molecular weight interrelations, measurement of, by GPC/IR, 191
Guiding polymer syntheses, GPC in, 215
HB polymer, characterization of, with GPC, 225
High-temperature exclusion chromatography of polyethylenes, method for, 143
Inception of GPC, 1
IR/GPC, measurement of functional group and molecular weight interrelations by, 191
Irradiated paraffins, crosslinking in, application of GPC to, 183
Linear polyethylene, fractionation of, with GPC, 153
Microscopy, optical and electron, of Bio-Glas chromatography substrates, 253
Model compounds, elution behavior of, in GPC, 105
Molecular size separability and polymer polydispersity, 5
Molecular weight distribution, and oil content of oil-extended elastomers, simultaneous measurement of, by GPC, 317
  and polymer reactors, 83
  of polypropylene, 301
Molecular weight and functional group interrelations, measurement of, by GPC/IR, 191
Oil content and molecular weight distribution of oil-extended elastomers, simultaneous measurement of, by GPC, 317
Oil-extended elastomers, simultaneous measurement of oil content and molecular weight distribution of, by GPC, 317

Optical and electron microscopy of Bio-Glas chromatography substrates, 253
Paraffins, irradiated, crosslinking in, application of GPC to, 183
Parallel-column systems in GPC, 199
Polybutadienes, carboxy-terminated, analysis of, by GPC, preliminary investigation, 297
Polydispersity, polymer, and molecular size separability, 5
Polyethylene, linear, fractionation of, with GPC, 153
  method for high-temperature exclusion chromatography of, 143
  unsaturation changes and other radiolytic reactions in, 159
Polynuclear aromatic hydrocarbon materials, GPC, studies of, 171
Polypropylene, molecular weight distribution of, 301
Porous silica beads, evaluation of analytical GPC columns packed with, 119
Radiolytic reactions in polyethylene, 159
Reactors, polymer, and molecular weight distribution, 83
Reshaping, computational method of resolving GPC, 67
Resolution, and fractionation in GPC, 13
  imperfect, methods of correcting for, 83
Resolving GPC, computational method of, reshaping, 67
Silica beads, porous, evaluation of analytical GPC columns packed with, 119
Substrates, chromatography, Bio-Glas, optical and electron microscopy of, 253
Surface coating vehicles, GPC in analysis of, 329
Techniques and applications, new, in GPC, 131
Tung's axial-diffusion equation for GPC, method of solving, 23
Unsaturation changes and other radiolytic reactions in polyethylene, 159
Vehicles, surface coating, GPC in analysis of, 329
Wood celluloses, characterization of chain length distribution of, by GPC, 283
